Certification. Guaranteed
Accuracy and Quality.**

About Us

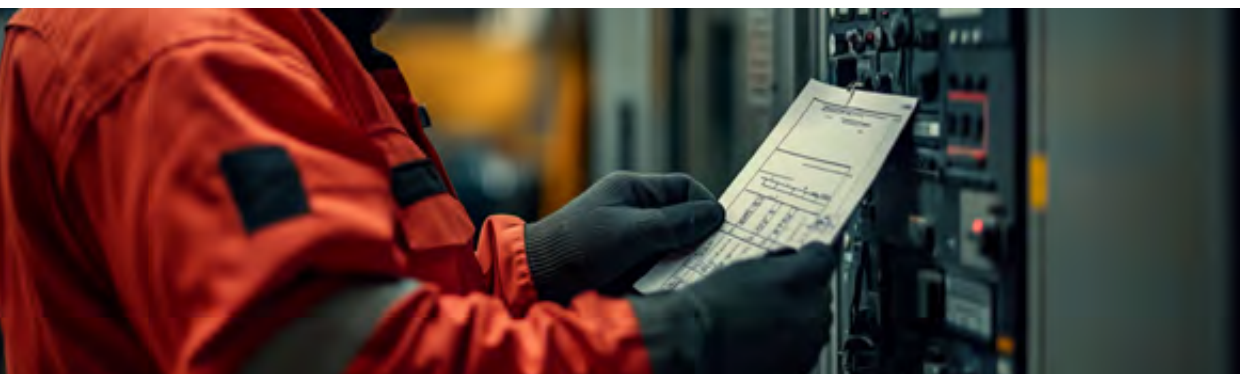

LABOR S.A. (LABOR), established in 1996, is a leading Greek certification organization combining technical expertise with extensive experience in national, European, and international standards. Our team of engineers and inspectors deliver dependable certification and testing services that meet the highest industry demands. Through strategic partnerships with top universities and laboratories both in Greece and abroad, we guarantee the highest quality and accuracy in all our services.

Supporting Businesses

LABOR helps businesses ensure their products meet the required quality, compliance, and competitiveness standards through specialized inspections and certifications. Our services provide several key advantages:

Our services provide several key advantages:

- **Compliance with Standards:** We assist businesses in meeting regulatory requirements, facilitating market access.
- **Product Safety and Reliability:** We ensure that products comply with EU health, safety, and environmental standards, guaranteeing legal market access.

- **Recognized Quality Certification:** Guarantees that electrical supplies meet technical specifications and can be registered with the Ministry of Development.
- **Voluntary Product Certification:** Certification to provide additional quality assurance and a competitive advantage.

Our certifications help businesses enhance their reliability, improve competitiveness, and ensure the availability of safe, high-quality products in the market.

Benefits of LABOR's Certifications

The certifications provided by **LABOR** offer a wide range of benefits for manufacturers, importers, end consumers, and regulatory bodies.

For Manufacturers and Importers:

- **Regulatory Compliance:** Ensures products meet safety, quality, and performance standards.
- **Market Access:** Simplifies legal sales in Greece and internationally.
- **Enhanced Competitiveness:** Increases brand credibility and adds value to products.
- **Risk Mitigation:** Helps avoid product recalls and legal issues due to non-compliance.

For Consumers:

- **Safety and Reliability:** Guarantees that products are safe and reliable for use.
- **Informed Decisions:** Offers transparency on product quality and performance.

For Regulatory Authorities and the Market:

- **Quality Assurance:** Ensures market products meet required standards, improving overall market quality.
- **Risk Reduction:** Protects the public from unsafe or substandard products.

LABOR's certifications ensure compliance, safety, and quality for products and services alike.

Testing and Measurements:

LABOR's laboratories are accredited according to ELOT EN ISO/IEC 17025 by ESYD, and by the WHO (for Voltage stabilizers) covering a wide range of applications. With years of experience, continuous staff training, and collaborations with laboratories in Greece and abroad, we offer reliable solutions to meet the testing needs of Greek manufacturers.

Services Include:

- Electrical safety tests
- Radio spectrum tests
- Sound noise measurements
- Thermal tests
- Mechanical tests
- Environmental tests
- Performance tests
- Electromagnetic field measurements
- Electromagnetic compatibility tests
- Special tests

Our services ensure that businesses achieve:

- **Product Safety:** Electrical safety testing to meet industry safety standards and minimize risks.
- **Durability and Performance:** Thermal and mechanical tests confirm product resilience under various conditions.
- **Environmental Compliance:** Environmental and electromagnetic field tests ensure products meet safety and health standards.
- **Optimized Performance:** Performance testing verifies product efficiency and functionality.

We ensure compliance with international standards for high-quality, safe products in the market.

LABOR S.A.: Reliability. Expertise. Innovation.

Energy Efficiency Measurements

LABOR provides energy efficiency testing for compliance with European Directives (ECODESIGN 2009/125/EC and Energy Labeling 2017/1369/EE), helping products meet market requirements.

We test products such as:

- Professional refrigerators
- Household refrigerators
- Water storage containers (boilers, buffers)
- Electric water heaters
- Radiators
- Dishwashers
- Power supplies
- Energy-efficient fireplaces & stoves
- Household equipment (standby & off mode)

Our services include the following benefits:

- **Lower Operating Costs:** Products with high energy efficiency reduce energy consumption, lowering costs.
- **Regulatory Compliance:** Ensures compliance with market requirements and avoids penalties.
- **Competitive Advantage:** Energy-efficient labeling attracts consumers focused on sustainability.
- **Environmental Impact:** Promotes energy savings and reduces CO2 emissions.

With a wide range of tested products, we support businesses in improving energy efficiency across industries.

Inspections and Audits

LABOR provides thorough inspection and audit services in areas including tourist accommodations, industrial facilities, fire detection and suppression systems, and technical documentation. We ensure compliance with national and international regulations and standards, offering reliable assessments that guarantee safety and quality. Our services are customized to meet the specific needs of each business.

Industrial Facility Inspections

We inspect industrial facilities based on international standards to ensure proper operation, construction quality, and regulatory compliance.

Fire Detection & Suppression System Audits

We conduct inspections of fire detection and suppression systems, ensuring their proper functioning in accordance with national and international standards.

Technical Documentation Audits

We verify technical documentation for product compliance with European Directives, ensuring accuracy and completeness.

Product Identification

We confirm that a product matches the technical documentation, ensuring proper identification and compliance with legal requirements.

LABOR S.A.: Your trusted partner in precise testing, rigorous inspection and reliable certification.

Why Choose Us?

With over 30 years of experience, LABOR is a trusted partner for certifications, testing, and inspections, with internationally recognized accreditations.

Working with our team ensures the benefits:

- **Independent & Impartiality:** As an independent organization, we ensure unbiased and transparent certification processes.
- **International Collaboration:** We work with leading universities and laboratories, ensuring access to advanced technologies and precise measurements.
- **Accredited Services:** Our tests and certifications are conducted in accredited laboratories, complying with ELOT EN ISO/IEC 17025.
- **Comprehensive Offerings:** From CE marking and safety testing to energy efficiency audits and fire safety inspections, we provide a wide range of services.
- **Expertise Across Key Sectors:** We specialize in areas such as electrical materials, machinery, energy-efficient devices, and industrial infrastructure, offering customized solutions.
- **Ongoing Support:** We keep businesses up-to-date with the latest regulatory and technological developments.
-

- **Compliance & Market Access:** Our certifications ensure your products meet legal requirements and gain CE marking and other internationally recognized certifications for easy market entry.
- **Fast and Effective:** We reduce certification times, enabling quicker market access without sacrificing quality.
