

LABOR S.A. – TRUSTED CERTIFICATION FOR THE DEFENSE SECTOR

Enhancing the Security and Resilience of Defense Systems

LABOR S.A. with 30 years of expertise in testing, inspection and certification is the trusted partner for organisations and businesses operating across various sectors with a recent expansion in the defense sector.

We provide advanced certification quality assurance and compliance solutions contributing to the protection of critical infrastructures and systems.

Our Services for the Defense and Military Systems

DEFENSE SYSTEMS AND EQUIPMENT CERTIFICATION

- Inspection and certification of electronic and mechanical systems
- Certification of military equipment and dual-use technologies
- Resilience testing under extreme conditions (temperature, vibration, humidity, etc.).

CRITICAL INFRASTRUCTURE MANAGEMENT SYSTEM CERTIFICATION

- Compliance with international standards and military specifications
- Evaluation and certification of industrial system resilience (SCADA, ICS, etc.)
- Fire safety checks and management of physical risks.

TESTING & MEASUREMENT FOR DEFENSE APPLICATIONS

- Electromagnetic compatibility (EMC/EMI) for military and aerospace systems
- Energy efficiency measurements and operational performance evaluation
- Structural material certification for resistance to stresses and explosions.

LABOR S.A. Upholds Compliance with International Standards

IEC 60068: Global environmental testing excellence
ECSS-E-ST-10-03C: Rigorous space engineering testing
AECTP - 300: Airworthiness for military equipment
AECTP - 400: NATO-compliant military testing
MIL-STD-81 OH: Military-grade environmental testing

STANAG - 4730: NATO standards for military gear
STANAG - 4340: Testing military equipment in extreme conditions
STANAG - 4703: Extreme environment compliance for military hardware
ATPD - 9404: NATO procedures for military vehicle testing

Why Choose LABOR S.A.

BENEFITS FROM OUR SERVICES

Enhanced Security and Resilience: Identify and reduce vulnerabilities, ensuring maximum protection.

International Compliance: Ensure certifications that comply with international and NATO Standards.

Fast and Reliable Process: Minimise inspection time, allowing for quicker system market deployment.

Boosting Trust: Serve as a guarantee of quality and safety for defense agencies and government services.
