

LABOR S.A., Independent certification and accredited testing that strengthens market confidence

Established in 1996, LABOR is Greece's independent product certification and testing organization. It supports manufacturers, importers, and public stakeholders with impartial certification, accredited laboratory testing, and conformity support across critical product categories. LABOR enables Greek manufacturers to access EU and international markets through verified compliance, while providing international suppliers with a credible pathway into the European market via Greek-based certification infrastructure.

KEY FACTS

- **30 years** of operation
- Accredited testing: ESYD, ELOT EN ISO/IEC 17025 / ELOT EN ISO/IEC 17065 for products & ELOT EN ISO/IEC 17021-1 for management systems
- **Registered with** EMEAT, ELKAK / **Member of** SEKPY, HASDIG, HELLAS LAB, HELLA CERT, Maintenance Cluster
- Partnerships with universities and laboratories in Greece and abroad
- **Notified Body 2537** – EU RED / EU EMC
- Recognized by the World Health Organization
- Serving export-oriented manufacturers in Greece and international suppliers entering the EU market

Role in the market

LABOR provides independent, technically defensible evidence that products meet applicable requirements and perform reliably. Its scope covers product certification and voluntary quality marks, accredited testing and measurements supporting national and European compliance, conformity and technical documentation support for CE marking, and sector-specific capabilities for complex equipment, including healthcare and defense applications.

Why it matters for development

- Supports export competitiveness through verifiable product trust
- Strengthens market quality by reducing non-compliance and unsafe products
- Helps Greek industry adopt evolving EU requirements with less friction
- Provides a credible, Greek-based technical partner across the product lifecycle

Independence and credibility

LABOR operates independently and impartially. All testing is performed in accredited laboratories aligned to ELOT EN ISO/IEC 17025, supported by continuous training and collaborations with universities and research institutions in Greece and internationally.

Capabilities at a glance

CERTIFICATION

Product certification across defined scopes, including voluntary quality marks that demonstrate verified performance and differentiation beyond baseline compliance.

TESTING & MEASUREMENTS

Electrical safety, electromagnetic compatibility (EMC), radio and spectrum testing, performance and environmental measurements, all under accredited laboratory conditions.

CONFORMITY & DOCUMENTATION

Technical documentation audits, product identification verification, and technical file review supporting CE marking activities and European market access.

INSPECTIONS & AUDITS

Industrial facility inspections, system audits, and verification activities supporting regulatory and operational compliance across production environments.

SECTORS SERVED

Household appliances

Electrical materials

Electrical panels & switchgear

IT & measuring instruments

Machinery & professional equipment

Wireless automation

Medical equipment

Defense applications

STRATEGIC GROWTH AREAS

DEFENSE & SECURITY

Active expansion into defense systems certification, including electronic and mechanical equipment testing, resilience testing under extreme conditions, and compliance with NATO and military standards (MIL-STD, STANAG, AECTP).

HEALTHCARE

Growing capabilities in medical equipment certification and healthcare infrastructure support, contributing to the safety and compliance of critical health sector technologies entering the Greek and European markets.

REGULATORY FRAMEWORK

LABOR's services align with key European directives and regulations, including the Low Voltage Directive (2014/35/EU), EMC Directive (2014/30/EU), Radio Equipment Directive (2014/53/EU), Eco-design Directive (2009/125/EC), Energy Labelling Regulation (2017/1369), and applicable national requirements for product safety and market surveillance.

A practical partner for compliant growth

LABOR combines technical rigor with business practicality. Our role is to provide independent evidence that products are safe, compliant, and ready to compete.
